The Finishing Touch

BEAUTIFUL SURFACES AND CONSIDERED HARDWARE THAT BRING A ROOM TOGETHER

KalingaStone

KalingaStone's Architectural Terrazzo collection presents White Ember & Hudson Sky, reimagining classic mosaic for modern homes. The design pairs a versatile light grey base blended with black, beige, grey, and brown chips, turning everyday surfaces into architectural features. With a smooth finish and resistance to water, fire, and cracks, it is well suited to high-exposure outdoor environments. From facade cladding and outdoor walls to flooring and bathroom vanities, KalingaStone brings a practical yet polished touch wherever it lands. **kalingastone.com**

Hettich

Hettich's AvoriTech drawer system shows that drawers designed to carry heavier loads do not have to look bulky. The drawer's slim 8 mm sides and concealed connectors keep the design clean, while the Actro YOU runners allow for smooth, quiet movement. Its minimal profile makes it easy to work into kitchens, wardrobes, and living spaces without adding visual weight. The result is storage that handles demanding loads while keeping the overall cabinetry visually light. **hettich.com**

Kajaria

Kajaria's latest collection, Adira from the Ultima series, brings the tactile richness of natural stone to large-format ceramic tiles. Using advanced digital manufacturing technology, the panels capture the grain, texture, and tonal variations of stone across a range of surface expressions, from smooth architectural finishes to more rugged, tactile ones. The palette moves from warm terracotta, mineral greys, and soft creams to bolder hues such as emerald, with sizes available in 1200 x 2400 mm, 1200 x 1800 mm, and 600 x 1200 mm formats. **kajariaceramics.com**

Ebco

Ebco's Spinova 360° concealed rotating cabinet system makes overlooked corners work harder, bringing greater accessibility to kitchens and wardrobes. Designed to rotate a full 360°, it keeps accessories organised and within easy reach while remaining neatly concealed within the cabinetry, with a load capacity of up to 80 kg. Suitable for inner cabinet heights of 400–1800 mm, it's an elegant solution that turns hard-to-reach corners into functional, seamlessly integrated storage. **ebco.in**

VOX

Welo Panels by VOX are a refined slatted cladding system for walls and ceilings, bringing a wood-like look to interiors with a soft, matte finish. Low-maintenance, waterproof, and insect-resistant, the panels pair easily with stone, plaster, brick, or concrete for layered compositions. They can be installed vertically or horizontally, with a palette spanning organic wood tones and contemporary solid colours, offering plenty of choice to pick a finish that feels just right. **voxindia.co**

Birla Opus

Metallic Mirage, a wall finish by Birla Opus, lends walls a lustrous, metallic sheen, bringing a sense of glamour and atmosphere to the spaces it inhabits. Inspired by the artistry of Italian craftsmanship, its lime-based surface has a fine, tactile quality that responds to changing light throughout the day, creating a sophisticated interplay of reflection and depth. The decorative texture is imported from Italy, lending the finish its distinctive character. **birlaopus.com**

A-Class Marble

A-Class Marble's Blue Onyx has an almost immersive quality, bringing to mind the feeling of being surrounded by water. Its aquamarine surface and fluid veining catch and reflect light, making spaces feel more expansive. Soothing without being understated, it can work across interiors in various ways, from a statement wall or backlit partition to a coffee table. The stone also works beautifully for lighting and smaller decor pieces, where its translucent quality can truly take the centre stage. **aclassmarble.co.in**

Curoq

Curoq's TerraEvoca Floreal wall finish by Matteo Brioni brings an organic sensibility to walls, combining a hand-modelled clay surface with delicate botanical imprints that give it a soft, sculptural quality, evoking foliage pressed into earth. Built up through successive layers of clay, it balances the rawness of the material with the delicacy of its botanical detailing, making it well suited to interiors that place materiality and organic forms at the heart of the design. **curoq.com**

The Right Address

The Right Address presents Anna Torf's new collection of vases, bowls, centrepieces, and sculptural objects, each handmade using centuries-old glassmaking techniques. This season brings new finishes and rich colourways, from smoky forest greens and sanded powder tones in the Ava range to a more vivid expression through its warm mandarin tones in the Termoska series. For over two decades, Anna Torf has worked with skilled artisans to create objects that invite a closer look at glass through light, colour, and form. **therightaddress.in**

Sugatsune

Sliding doors have long been a smart way to save space, but Sugatsune's MFU1200 Flush Door System takes the idea a step further. Part of the brand's Sliding Door Systems, it allows the door to sit flush with the wall when closed, creating a seamless transition between door and surface. With no floor grooves, bottom rails, or handles to interrupt the clean lines, the door can be operated with soft close and self-close mechanisms. Particularly suited to hospitality interiors, the concealed hardware makes it ideal for creating discreet entrances, closets, hidden rooms, and integrated storage areas. **sugatsune.com**

Lamiwood

Lamiwood introduces Hybrid Laminated Flooring designed for contemporary interiors and everyday living. At its core is a rigid, high-density fibreboard that brings the warmth and look of wood, topped with an AC5 wear layer built to resist scratches, stains, and heavy impact. Tight-locking seals help the flooring withstand surface liquids for over 100 hours, while chemically safe materials make it a practical choice for homes with kids and pets. **lamiwood.in**

Coast to Coast

Dyed veneers from Coast to Coast bring colour to wood without losing what makes it appealing in the first place. Unlike paint or polish, the colour lets the material's natural grain and texture come through, giving the surface a more authentic look. Available in a wide range of shades, the veneers offer plenty of room to experiment, whether used on cabinetry, furniture, wall surfaces, or smaller interior details. It's a simple way to add colour while keeping the character of wood intact. **coasttocoast.in**
