While the pandemic did disrupt
business for a brief period of time,
it also gave us an opportunity to
explore newer markets.
Amit Shah,
MD, Classic Marble Company

INSIDE:

M+ INDUSTRIES IN FOCUS : Leather I Marble I Plywood

RAJESH BHANDARI
Director, A-Class Marbles

Marble flooring is immensely durable as well as stylish. It is not only known for its superior and luxurious appearance but also its facile and reasonable maintenance. For instance, to keep marble flooring clean, you just need to wipe it with a clean cloth daily. Marble can also be re-polished after a couple of years, giving the flooring a renewed look.

Marble can also be applied to sites in high-temperature regions as it is the most comfortable flooring material due to its cool surface, even in extreme temperatures. This versatility of marble makes it a more sustainable and superior choice of flooring material. Marble is a soundproof and sturdy material

Our client range covers many names, including celebrities from various fields such as sports, celebrities like MS Dhoni and Gautam Gambhir. Large hospitality clients like the Oberoi, Radisson Blu, JW Marriott, Taj and Vivanta groups. The Lalit, Sheraton, Hyatt and Shangri-la chains also form a large part of our clientele. We have also worked with notable AEC industry names like Tata Housing, Piramal, Reliance, DLF, Indiabulls and more. We have also worked with architects and interior designers like Habitat Architects, Abhimanyu Dalal Architects, as well as end users like Zafar Chaudhry and Tarun Tahiliani.

Manufacturing
Marble has always been a timeless beauty. Indians recognize it and still prefer marble as a flooring material. The variety and the everlasting beauty it offers.

Our company's manufacturing and production unit is located in Kishangarh, Rajasthan. Rajasthan is the largest producer and resource holder of marble in India. The majority of the manufacturing of marble is situated in Rajasthan.

The future
Marble is a perennial material. The correlation between architecture and marble is timeless. For instance, be it 'the Parthenon - built in 447 BC, or the Taj Mahal - built in the 1630s or KAFD Mosque - built in 2017 - these structures prove that the timelessness of marble can never fade away.
