AS AN ARCHITECT, WE ALL STRIVE TO CREATE HABITABLE ART

In a conversation with Vikas Bhadra, William S. Duff, Founder & Managing Principal, William Duff Architects opines great architecture is very moving and can evoke the same emotional reaction as one would have to a work by a master painter or sculptor.

Ramesh Bhandari,
Director,
A-Class Marble

Marble is a highly durable and long-lasting flooring material

Marble can be used in high-temperature regions and also is resistant to fire. In addition, marble undergoes various processes to increase its durability, before it arrives in the shops, says Ramesh Bhandari, Director, A-Class Marble.

What according to you are some of the timeless methods of flooring which continue till date?

Marble in any form appears to be a timeless material. When it comes to the selection of flooring methods that continue even today, then the elegant classical pattern and chequered pattern add royalty and elegance to any space. To add diversity, the chequered pattern is combined with a metal or diamond motif to take the classy look to a whole new level. Multiple materials and colours in different rooms, transform the entire house into timeless art.

Are they useful in the contemporary urban framework as well?

The classical and chequered patterns add a touch of royalty and luxury to any space. Just as the durability of the marble is given priority, the look that is never out of trend is also planned accordingly. Additionally, the contemporary age demands a stylish and sophisticated look that is a visual feast to the eyes.

When it comes to robust flooring, what kind of flooring material or design will you advise?

When we look at flooring in terms of durability, marble is highly durable and long-lasting. It can be used in high-temperature regions and also is resistant to fire. In addition, marble undergoes various processes to increase its durability, before it arrives in the shops.
